IPv6 Certification

Jan Prunk

Linux System & Network Administrator
Slovenia

Summary

I am interested to hear from you about possibilities for project assignments or employment as a Linux System Administrator or Network Engineer (or both). If you seek a new worker in Slovenia or German-speaking Europe (Austria, Germany, Liechtenstein, Luxembourg or Switzerland) I would consider relocating for a job which requires an on-site position. I am also available to telecommute for work to other locations.

I am available for Linux system administration, consulting, support and quality testing. If you need local presence, I am ready to assist locally. I can manage various tasks, including obtaining and building the required hardware, installing and configuring the operating systems, network and services. I am interested to learn about new technologies. My communication skills include: help desk support, telephone support, troubleshooting, writing and customer relations.

Skilled with:

Computer hardware: servers, personal computers, notebooks, single-board computers, embedded systems, smartphones, tablets, vintage computers

Network hardware: Cisco/Mikrotik switches and routers

Primary OS: Debian Linux

Other OS's: Ubuntu and other Linux distributions, NetBSD, Microsoft Windows

Data communication: TCP/IP, IPv6, Ethernet, Microsoft Windows networking, Linux networking, Wi-Fi networking, Virtual Private Networking (OpenVPN) & Remote control

Switches and routers: Cisco IOS, Mikrotik RouterBOARD RouterOS, Mikrotik SwitchOS, OpenWrt, VyOS, Quagga, Free Range Routing

(FRR), Layer 2/3, Border Gateway Protocol (BGP), IXP peering, RIPE DB, Peering DB

Firewalls, Computer System Monitoring, Network Monitoring, Infrastructure Monitoring

LAMP: Linux, Apache, MySQL, php

Virtualization: Linux-Vserver

Storage: Network File System (NFS), Logical Volume Management (LVM)

Command language: Bash

Markup languages: HTML, Wiki

Past experience:

Voice over Internet Protocol (VoIP), Private Branch Exchange (Asterisk), Public Switched Telephone Network (PSTN), Integrated Services Digital Network (ISDN), Global System for Mobile Communications (GSM), Inter-Asterisk eXchange (IAX), Session Initiation Protocol (SIP), Asterisk Billing

Telecommunication hardware: VoIP phones, GSM transmitters
